Aerovox Industries Inc  
Attn: Mr. Norman Butterworth  
740 Belleville Ave  
P.O. Box B 970  
New Bedford, Mass 02741

Facility: Aero<sup>v</sup>ox Corporation-742 Belleville Ave  
Permit No: MA0003379  
Expiration Date: 1-1-77

Dear Sir:

Your NPDES, wastewater discharge permit, under provisions of the Federal Water Pollution Control Act Amendments of 1972 (Public Law 92-500, Section 402), will expire soon. If you plan to continue discharge of wastewater from a point source to a surface water of the United States after the expiration of the current permit, you must submit a new application for a new permit 180 days prior to the expiration date.

An appropriate form and instructions are enclosed for reapplication. When completed, forward the signed original of the application to this Agency (Attn: Michael J. O'Brien), and send a copy to your state water pollution control agency. The new application should accurately describe the discharge expected to continue after expiration of the current permit. Please, carefully complete all applicable items on the form, freely adding explanatory notes on the form or in a cover letter as necessary.

If your wastewater discharge is not continuing beyond the term of the current permit, please inform this Agency regarding disposition of the wastewater. We will assume that a discharge is continuing, and we will expect a new application unless advised otherwise.

If you have any questions regarding application for permit, please write or telephone (617)223-5013, Mr. O'Brien.

Sincerely yours

Edward J. Conley  
Chief, Permits Branch
